

# Developmental Biology Seminar Series

**2010**  
Semester 2 Timetable

Seminars are held on **Fridays at 12:00 pm in M3, Building 13A** unless otherwise stated.  
Lunch will be served after the seminar in Building 76/77 Core.

Date	Name	Title	Primary Affiliation
20th Aug	Catherine Boisvert	How to make a fish walk Evolution and development of the pelvic girdle in the first land vertebrates	ARMI
3rd Sep	Greg Hannigan	Convergence of Integrin and Hedgehog signalling in the primary cilium	Monash Institute of Medical Research <i>Centre for Cancer Research</i>
17th Sep	Phillip Poronnick	Right time, right place: dynamic regulation of membrane proteins	RMIT <i>School of Medical Science Molecular Physiology Group</i>
12th Oct <i>TUESDAY</i> 11am	Mark Shackleton	Understanding melanoma progression	Peter MacCallum Cancer Centre <i>Cancer Therapeutics Program</i>
29th Oct	Mary Tolcos	Neurodevelopmental consequences of intrauterine growth restriction	University of Melbourne <i>Dept. Anatomy &amp; Cell Biology</i>
12th Nov	Paul Lockhart	Functional analysis of ciliary proteins - roles in human development and disease	Murdoch Children's Research Institute <i>Bruce Lefroy Centre for Genetic Health Research</i>
26th Nov	Ken Walker	Final PhD Presentation	Department of Anatomy & Developmental Biology
