

The Developmental Behaviour Checklist (DBC)[©]

Stewart L. Einfeld University of Sydney, Australia

Bruce J. Tonge Monash University, Australia

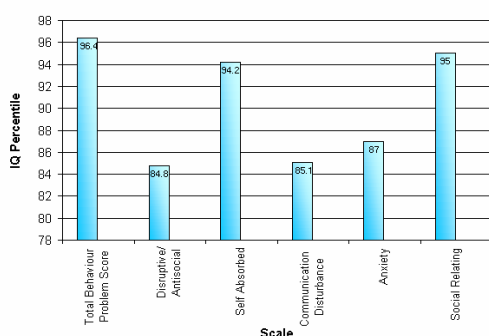

The DBC provides comprehensive assessment of behavioural and emotional disturbance in people of all ages with intellectual disability

Features:

DBC-P Report

ID Number..... 5845 Name Fictitious Person
DBC Date 25/06/2003 Level of ID Moderate
DBC Completed by Grandparent Gender Female

| Scale | Score | Mean Score | IQ Percentile |
|-------------------------------|-------|------------|---------------|
| Total Behaviour Problem Score | 86 * | 0.905 | 96.4 |
| Disruptive/ Antisocial | 25 | 0.926 | 84.8 |
| Self Absorbed | 27 | 0.871 | 94.2 |
| Communication Disturbance | 10 | 0.769 | 85.1 |
| Anxiety | 8 | 0.889 | 87 |
| Social Relating | 10 | 1.000 | 95 |

* This score is at or above the clinical cut-off score of 44

DBC Autism Screening Algorithm Score = 30

This score is at or above the threshold of 17, indicating that a full diagnostic assessment would be likely to reveal a diagnosis of Autism

Print DBC-P Report

- Separate Parent/Primary Carer (DBC-P) & Teacher (DBC-T) versions for children & adolescents.
- DBC-P & DBC-T provide Total Behaviour Problem Score and Subscale scores, measuring disturbance in 5 dimensions: disruptive/antisocial, self-absorbed, communication disturbance, anxiety, social relating
- DBC-A for assessment of adults
- DBC-M for the daily monitoring of up to five target behaviours

- **New!** DBC-P24- a short form of the DBC-P suitable for research settings
- 2nd edition DBC manual for DBC-P and DBC-T
- Scoring software which produces a printable report (pictured) & has accompanying user's manual
- Hand-scoring sheet also available
- Community norms derived from a multi-centre epidemiological study
- Extensive reliability and validity data
- Accurate cut-off scores for distinguishing cases from non-cases determined by Receiver Operating Characteristics
- Easy to use format: 15-20 minute completion time
- Suitable for use in clinical or research settings
- Autism Screening Algorithm: provides indication of the need for a full autism diagnostic assessment
- Annotated bibliography of publications using the DBC is available on request

DBC-P forms are available in:

English, Arabic, Bulgarian, Cambodian Chinese, Croatian, Dutch, Finnish, French, German, Greek, Hindi, Italian, Japanese, Malay, Norwegian, Portuguese, Portuguese (Brazil), Spanish, Swedish, Turkish and Vietnamese

Enquiries and Orders Email: DBC@med.monash.edu.au

Western Psychological Services (WPS) is now the publisher of the Developmental Behaviour Checklist (DBC) and all related materials. **Until the WPS edition is available we will continue to provide you with prepublication DBC materials.** Once the publisher has finalised and produced the WPS version of the DBC, we will cease authorizing publication uses, and refer all DBC enquiries to their offices. Information and order forms will be available on the WPS website in due course
