Male reproductive health

Reproductive health cannot be considered in isolation to other aspects of men’s health. Not only can some issues impact on quality of life and feelings of wellbeing, but others may also be a sign of more serious conditions. For example, erectile dysfunction may be the first sign of heart disease or diabetes. So it’s important that men speak to their doctor about any sexual and reproductive health concerns.
**Key people**

**Professor Robert I McLachlan (Director)**

Professor Robert McLachlan (Director) is a NHMRC Principal Research Fellow at Prince Henry’s Institute and is Deputy Director of Endocrinology at the Monash Medical Centre. He specialises in the area of male reproductive medicine and has made significant contributions to the research in endocrinology, infertility and andrology. He combines his academic career with active clinical practice as a consultant in these fields. Rob is a consultant to the World Health Organisation (WHO) on male infertility regulation, is a former President of the Fertility Society of Australia, and former Secretary of the International Society of Australia.

Professor McLachlan is also secretary of the International Society of Andrology and a consultant to the World Health Organisation (WHO) on male infertility regulation.

**Dr Carol Holden (CEO)**

Dr Carol Holden (CEO) joined Andrology Australia at its inception in 2000 and ensures the program maintains effective administrative and financial management and oversees the outputs of specific project activities. Published internationally and recipient of a number of awards for her work, Carol has more than 15 years experience in male reproductive health education and research. Completing her PhD at Monash University in reproductive physiology in 1994, she has more recently completed a Masters of Public Health (La Trobe University) with a major in health policy.
