Cancer Survivorship Research Seminar

Seminar Program

12.30 – 1.00 Registration and Lunch
1.00 – 2.00 “Cancer Survivorship Research” presented by Professor Eva Grunfeld
2.15 – 2.45 Current cancer research being undertaken at the interface between primary care and cancer services at Monash/SMICS
2.45 – 3.00 Afternoon tea
3.00 – 4.15 Building a research agenda in primary care cancer research at Monash/SMICS
4.15 – 4.30 Concluding remarks

International Guest Speaker

Professor Eva Grunfeld, MSc, MD, DPhil, FCFP
Clinician Scientist, Ontario Institute for Cancer Research
Giblon Professor and Vice Chair, Research, Department of Family and Community Medicine, University of Toronto

Dr. Eva Grunfeld is a physician scientist with the Ontario Institute for Cancer Research, Health Services Research Program and Director of the Knowledge Translation Research Network. She is also the Giblon Professor and Director of Family Medicine Research at the Department of Family and Community Medicine, University of Toronto. From 2004 to 2008 she founded and directed the Cancer Outcomes Research Program at Cancer Care Nova Scotia and Dalhousie University. She obtained her medical degree from McMaster University and doctoral degree in cancer epidemiology from Oxford University.

Dr. Grunfeld is a leader in cancer health services and outcomes research. Her research focuses on evaluation and knowledge translation of cancer health services, covering the entire spectrum of cancer control activities. She uses a mixed-methods approach including randomized controlled trials, qualitative research and outcomes research. Knowledge translation is integral part of all her research activities. Dr Grunfeld is internationally recognized for research on cancer follow-up and cancer survivorship. She has conducted several multi-centre RCTs on cancer follow-up care establishing the safety and acceptability of primary care based follow-up of breast cancer patients, which has influenced clinical practice guideline internationally. Dr. Grunfeld holds many peer-review grants as Principal Investigator and has served on many committees to further the goals of cancer control in Canada and internationally.

RSVP is essential. To register email pearl.noronha@monash.edu by Friday November 7th.
LOCATION – Notting Hill Campus

Omnico Business Centre - Building 1, 270 Ferntree Gully Road, Notting Hill
