

Medicine, Nursing and Health Sciences

PhD in Clinical and Public Health Research

School of Public Health and Preventive Medicine

SPHPM is in one of Victoria's largest applied research environments and is home to many national research centres and registries.

The School comprises the Department of Epidemiology and Preventive Medicine, Department of Forensic Medicine, Centre for Obesity Research & Education, Australasian Cochrane Centre, the Jean Hailes Research Unit, the Monash Applied Research Stream and the Monash Ageing Research Centre.

Join over 120 doctoral students in one of Australia's largest teaching and research precincts.

- Training for leadership;
- Wide range of discipline areas;
- Global linkages, partnerships and collaborations; and
- Co-located with The Alfred hospital, Centres of Excellence, registries and other research resources.

Scholarship applications close 31 May and 31 October.
