The Education Program in Reproduction and Development

VITRIFICATION WORKSHOP REGISTRATION FORM

21st – 22nd August 2010

Course participants:

This workshop is designed for embryologists (research and clinical) who wish to improve their understanding of vitrification, both theoretically and practically.

Facilitators: Leaders in the field will guide participants through the Program. Speakers from IVF laboratories will share their clinical experiences following their transition to vitrification. The workshop will provide extensive hands-on practical skills development in vitrification and warming together with short lectures and lab-based discussion groups.

PROGRAM	
Practicals	<ul style="list-style-type: none"> • Video demonstrations of vitrification • Preparation of media for vitrification and thawing • Hands on, one on one training for vitrification and thawing of mouse embryos • Independent practical skills training in vitrification, thawing and culturing of embryos • Mouse embryos of all stages and mouse and sheep oocytes available
Lectures and Discussion Groups	<ul style="list-style-type: none"> • Theory of vitrification and slow cool freezing • Recent clinical experiences and success stories with embryo vitrification • Media and devices available for vitrification: knowing what is important?

REGISTRATION

FULL REGISTRATION INCLUDES:
