

Biochemistry and Molecular Biology is a central subject in Biological and Biomedical Sciences

Careers in Biochemistry and Molecular Biology

Biotechnology-based industries

- pharmaceuticals-antibiotics, drugs and vaccines
- chemicals-fine and bulk chemicals, including enzymes
- chemicals in the environment
- food-production and quality control
- brewing industries

Research laboratories

- universities
- CSIRO
- primary industry and agriculture

Diagnostic laboratories

- hospital
- veterinary
- diagnostic pathology
- public health

Teaching

- secondary schools
- universities

Government departments and agencies

- agriculture
- health
- forensic science
- patents

Sales and marketing

- medical and technical skills
- pharmaceuticals

Technical and organisational management

- patent law
- science journalism
