

# Poker machine losses by Victorian electoral district 2012-13

Dr Charles Livingstone  
Global Health and Society Unit  
School of Public Health and Preventive Medicine  
Monash University  
November 2013

## **Introduction and acknowledgements**

This report provides details of the losses incurred by poker machine gamblers in the financial year 2012-13, aggregated to the level of Victorian electoral districts. The project was commissioned and funded by Mr. Paul Bendat of <http://pokermachinesharmvictoria.org/>

The report was prepared by Dr. Charles Livingstone. Research support was provided by Ms Cassandra Wright.

## **Method**

Data reporting the net gaming revenue (NGR) of poker machine venues operating in Victoria in 2012-13 were obtained from the website of the Victorian Commission for Gambling and Liquor Regulation (VCGLR). NGR is equivalent to the net losses incurred by poker machine gamblers for the period in question. The addresses of poker machine venues are also reported on the website of the VCGLR, and this permits them to be mapped against the boundaries of Victorian electoral districts. This was undertaken using information and mapping software accessible via the website of the Victorian Electoral Commission. Venues were then allocated to Victorian electoral districts, and the total losses calculated for each electoral district.

## **Results**

The results of the analysis outlined above are reported in Table 1. Table 2 sets out losses at the level of poker machine venues.

## **Discussion**

Total poker machine losses in 2012-13 were \$2,490,488,906. There were 530 venues operating at 30 June 2013, operating a total of 27,633 poker machines. Average losses per poker machine were \$90,127, and average losses per venue were \$4,699,036.

At the electoral district level, average poker machine losses were \$28,626,309. The highest losses were \$80,281,575 in the Melbourne electoral district. Lowest losses were \$1,867,595 for the Monbulk electoral district. There were an average of six poker machine venues in each electoral district. The highest number of venues was 13, in the Melbourne electoral district, and the lowest number was one, in the Mill Park, Kew and Box Hill electoral districts. The average number of poker machines per electoral district was 318, the maximum 847 (Melbourne electoral district) and the minimum 47 (Kew electoral district).
