While new to the Gippsland Medical School I have been with the Faculty for five years, previously with the School of Nursing and Midwifery where I administered the Clinical program for nursing students.

My role with the Gippsland Medical School is to manage all aspects of student administration. This includes enrolment, progression, timetabling, co-ordination of exams and of course supporting our academic staff.

I will also represent the school on Faculty and School committees and will be working closely with the MBBS administrative teams to ensure we remain closely aligned to the medical schools at Clayton and in Malaysia. I am Gippsland born and bred and grew up in here in the valley. My family's farmland was where you now see the Hazelwood pond.

My interests include collecting books, mainly children's literature in pursuit of which

I spend many hours scanning markets and op – shops. I also enjoy movies, theatre and cooking.

I look forward to welcoming our first group of students on January 29th.
