

Department of Pharmacology 2008 Seminar Program

Date	Speaker(s)	Title	Chair	Room
July 21	Dr Nicki Konstantakopoulos	Phytoestrogen induced gene (gene product) changes in the human endometrial carcinoma cell line, Ishikawa	S Selemidis	M3
	Dr Brad Broughton	Contribution of rho kinase to elevated basal pulmonary arterial tone following chronic hypoxia		
August 4	Prof Roland Stocker	The role of heme oxygenase-1 in the atherosclerotic vascular disease	B Kemp-Harper	M3
August 11	A/Prof Terry Johns	Targeting signalling pathways in glioma with novel therapeutics	H Schmidt	M3
August 18	Prof Peter McIntyre	Sensing heat and cold and the search for new analgesics	A Christopoulos	S3
September 1	Dr Katie Leach	Allosteric modulation of the M4 muscarinic receptor. Implications for Schizophrenia	A Miller	M3
	Dr Sebastian Furness	Analysis of calcitonin receptor function		
September 29	Dr Dana Hutchinson	Regulation of AMP-activated protein kinase by G protein-coupled receptors	T Gaspari	M3
	Dr John Simms	Molecular modelling of G protein-coupled receptors		
October 13	A/Prof Mibel Aguilar	Peptidomimetic strategies to turn bioactive peptides into drugs	R Widdop	M3
October 27	Dr Graham Mackay	Regulation of airway smooth muscle cell function by antibody Fc receptors and mast cells	R Loiacono	M3
November 3	Prof Bevyn Jarrott	Design and serendipity in the quest for neuroprotective drugs	P Sexton	M3
