LOOKING FOR A NEW PROFESSIONAL CHALLENGE?

THE OPPORTUNITY EXISTS TO ADVANCE YOUR PROFESSIONAL PRACTICE

IN RADIATION THERAPY WITH SHORT COURSE STUDY AT MONASH UNIVERSITY

Monash University is offering non-award professional practice units of study for qualified Radiation Therapists. These short course units have been designed to suit practitioners who are looking at enhancing their academic knowledge. The courses are designed to:

• advance your professional knowledge, and understanding
• review and enhance your own and others practice
• manage complex issues and problems
• lead practice developments

Each course has been written by clinical experts and they provide you with a flexible program of study able to reflect your individual development needs.

Academic units of study on offer in 2014 are:

- Imaging for Advanced Radiation Therapy Practice
- Principles and Practice of Breast Localisation
- Radiation Therapist Treatment Review

Each short courses comprises two academic units of study. They are designed to be completed over 1 academic year, however options are available to study single units and take 2 years to complete a short course.

Entry requirements for Non-Award short courses

Applicants require:
- An undergraduate degree or diploma in Radiation Therapy, Medical Radiations or similar.
- A minimum of 3 years clinical experience recommended for clinical units
- Access to online databases and journals (Radiation Therapy, Patient Care, Imaging and Medical).
  This may need to be arranged through your clinical centre. Access to the Monash University library is not provided with any of these non award course.

Applications will be considered on an individual basis. Applicants must be prepared to be intellectually challenged and to reflect on your clinical practice and consider how it may be improved based on critical evaluation. Applicants should be motivated, able to contribute to discussion and debate, and be prepared to study independently to explore the research literature that underpins practice.

Off-Campus study

All of these courses are delivered by distance education using the Monash on-line learning platform (Moodle). This method of delivery makes them attractive because there is no need for you to attend classes at the University.

Further information/Enrolment

As these courses are non-award programs they are run through the Department of Medical Imaging and Radiation Sciences. For further information or to enrol, contact catherine.osborne@monash.edu. Applications close 31st Jan 2014.

Fee

Domestic (Australian Residents): Each single unit enrolment is $500.
International (RT practicing outside Australia): Each single unit enrolment is $1000.
