

Stroke Survivor Research

Are you an allied health professional* who works with stroke survivors in the community?

*occupational therapist, physiotherapist, speech and language therapist, social worker

If so, we invite you to participate in a study that is exploring factors that affect community participation of stroke survivors who live in the community.

The study involves a 30 minute interview about your experience of working with stroke survivors. The interview would be conducted at a time and place that is convenient to you.

It is envisaged that this study will identify strategies that will enhance health interventions to address community participation needs of stroke survivors.
