

# Stroke Survivor Research

**Are you a stroke survivor?**

**Have you been home at least 9 months since your stroke?**

If so, we invite you to participate in a study that is looking at how health and community services meet the needs of people who have had a stroke.

This will lead to recommendations for practice.

The study involves a 30 to 60 minute interview at a time and place that is convenient to you. The interview will include topics such as your experience of having a stroke, receiving treatment and rehabilitation, and returning home.
