If you have completed or are about to complete an undergraduate degree and have an interest in health science and people, then come to this information evening.

In Western Australia, clinical radiation oncology departments collaborate with Monash University in delivering a two year off-campus graduate entry pathway into the radiation therapy profession. The information evening will explain how you can gain entry into this 72-credit-point coursework degree which offers Commonwealth Supported Places (CSP).

You will learn how the program enables you to concurrently study and work as a student radiation therapist whilst being financially supported. Upon successful completion of the course, graduates are eligible for registration and professional recognition.

Make the most of this great opportunity; it’s not to be missed!

Date: Tuesday 2 March
Time: 5.30 – 7 pm
Location: Radiation Oncology (F block), Sir Charles Gairdner Hospital Nedlands

For more information: Contact Michelle or Clare at: RTEDU.RadOnc@health.wa.gov.au or telephone 08 9346 3992 to register your interest.
